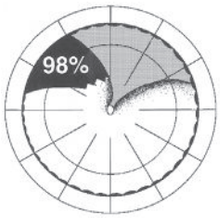
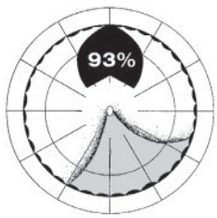
[NEW 2024]LAB-RETINAL IMPLANTS CATALOGUE [FINAL]E.indd 1 2024-10-08 15:28

Lincoff rules for finding primary break



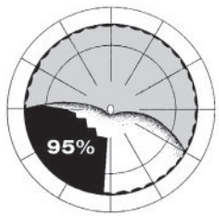
Superior Temporal or Nasal Detachments

In 98% of the cases, the primary break lies within 1-1/2 clock hours of the highest border.



Total or Superior Detachments that Cross the 12 o'clock Meridian

In 93% of the cases, the primary break is at 12 o'clock or in a triangle, the apex of which is at the ora serrata, and the sides of which intersect the equator 1 hour on either side of 12 o'clock.



Inferior Detachments

In 93% of the cases, the higher side of the detachment indicates on which side of the 6 o'clock radian an inferior break lies. When an inferior detachment is bullous, the primary break lies above the horizontal meridian.
